

APPENDIX 10 – OLD GROWTH MONITORING STAND PHOTOGRAPHS

Stand 32805008

Stand 61201094

Stand 40806068

Stand 33301017

Photos of existing old growth stands with no management disturbance

Photo of stand 40806062 ten years after ecoburning – existing old growth

Photos of stand 40806099 ten years after ecoburning – existing old growth

Photos of stand 32806003 showing the extent of the mortality in the southwest corner. Stand overall is existing old growth.

Stand 50201040 after harvest – existing old growth

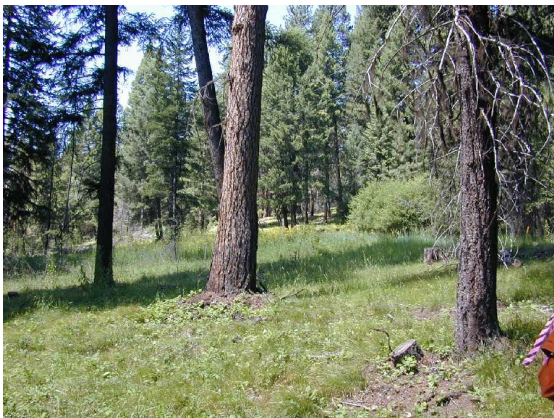

Stand 51301040 after harvest – existing old growth

Stand 61201063 after harvest – existing old growth

Stand 61201078 after harvest – existing old growth

Stand 61204008 after harvest – existing old growth

Stand 74402084 after harvest – existing old growth

Stand 76901099 after harvest – existing old growth

Photo of stand 33202004 after harvest – existing old growth

Photos of stand 42704006 after harvest and burning – no longer old growth

Photos of stand 51304036 after harvest – not old growth

Photos of stand 53302005 after harvest – existing old growth

Photos of stand 52303026 after high intensity wildfire – no longer old growth

Photos of stand 52303032 after high intensity wildfire – no longer old growth

Photo of stand 76501071 after high intensity wildfire – no longer old growth

Stands with Low Intensity Wildfire

Photos of stand 52303023 six years after a low intensity wildfire – existing old growth

Photo of mortality in stand 76701014 – no longer old growth

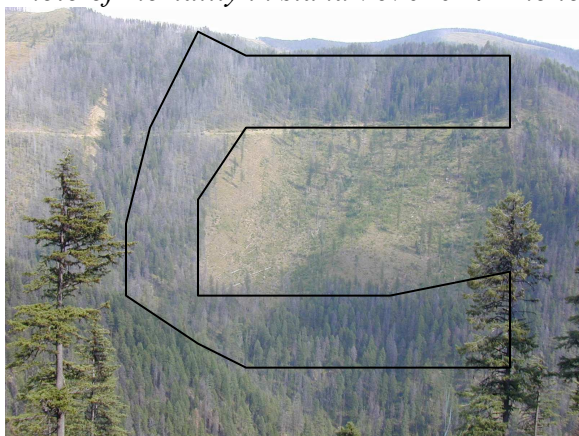

Photo showing the approximate boundary of stand 76701014 and amount of live trees not sampled on random plot locations. Note the two patches of green trees above the old clearcut and the large patch below the old clearcut.

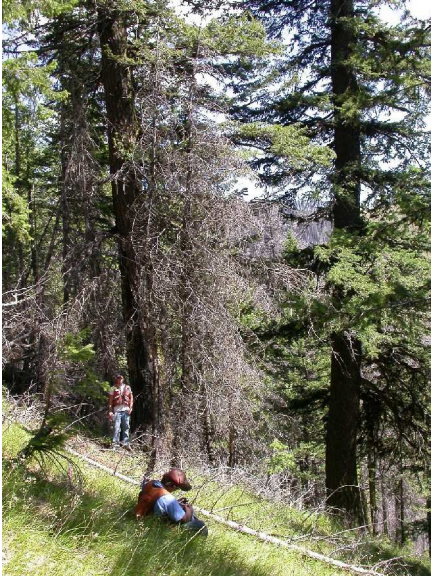

Photo of stand 76701015 six years after low intensity wildfire – no longer old growth

Photo of stand 76701019 six years after a low intensity wildfire –no longer old growth

Photos of stand 76802204 six years after low intensity wildfire – no longer old growth

Stands with Mixed Severity Wildfire

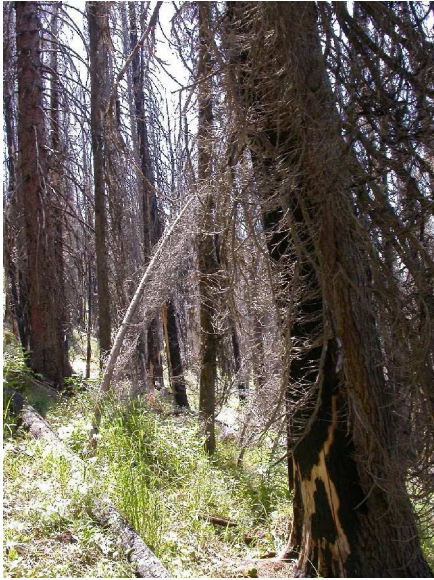

Photo of stand 76701010 six years after mixed severity fire – no longer old growth
